MEMORANDUM FOR: Chief, Development & Engineering Division, TSSG

SUBJECT : Requirement for Space and Equipment for  Human Factors Tests

25X1

25X1 1. Part of the Interpretation Research Program requires that the contractor  prepare and administer two separate tests to two different groups of IEG interpreters. These tests will require a space for six light tables in order to test up to six interpreters at one time. This space should be about 12'X20', in a rather isolated area so that the test will not incur interruptions or disruptions.

2. These tests will be administered during June, July, and about the first half of August. Completion, however, could be delayed by operational requirements on the PI's time.

3. In addition to the space requirement, the tests will also require the use of six good light tables plus six zoom 70 (or zoom 240) microstereoscopes.

25X1
